Part 1	Materials and Mechanical Design	1
1.	Structure of Solids	3
1.1	Introduction	3
1.2	Metals	12
1.3	Ceramics	14
1.4	Polymers	15
1.5	Composites and Coatings	15
2.	Steel	17
2.1	Metallography and Heat Treatment	18
2.2	Iron-Iron Carbide Phase Diagram	19
2.3	Hardenability	25
2.4	Heat-Treating Processes	26
2.5	Carbon Steels	31
2.6	Dual-Phase Sheet Steels	35
2.7	Alloy Steels	36
3.	Aluminum and Its Alloys	45
3.1	Introduction	45
3.2	Properties of Aluminum	45
3.3	Aluminum Alloys	46
3.4	Alloy Designation Systems	46
3.5	Mechanical Properties of Aluminum Alloys	48
3.6	Working Stresses	49
3.7	Characteristics	51
3.8	Typical Applications	52
3.9	Machining Aluminum	53
3.10	Corrosion Behavior	54
3.11	Finishing Aluminum	56
3.12	Summary	57
4.	Copper and Its Alloys	59
4.1	Copper	59
4.2	Sand-Cast Copper-Base Alloys	60

5. Nickel and Its Alloys	71
5.1 Introduction	71
5.2 Nickel Alloys	72
5.3 Corrosion	80
5.4 Fabrication	82
5.5 Heat Treatment	84
5.6 Welding	86
5.7 Machining	86
5.8 Closure	88
6. Titanium and Its Alloys	91
6.1 Introduction	91
6.2 Alloys	92
6.3 Physical Properties	96
6.4 Corrosion Resistance	97
6.5 Fabrication	98
6.6 Specifications, Standards, and Quality Control	105
6.7 Health and Safety Factors	107
6.8 Uses	107
7. Magnesium and Its Alloys	109
7.1 Introduction	109
7.2 Uses	109
7.3 Alloys and Properties	110
7.4 Fabrication	110
7.5 Corrosion and Finishing	113
8. Plastics and Elastomers	115
8.1 Introduction	115
8.2 Commodity Thermoplastics	116
8.3 Engineering Thermoplastics	120
8.4 Fluorinated Thermoplastics	124
8.5 Thermosets	128
8.6 General-Purpose Elastomers	129
8.7 Specialty Elastomers	129
9. Composite Materials and Mechanical Design	131
9.1 Introduction	131
9.2 Reinforcements and Matrix Materials	136
9.3 Properties of Composite Materials	142
9.4 Processes	161

9.5	Applications	163
9.6	Design and Analysis	184
10.	Stress Analysis	191
10.1	Stresses, Strains, Stress Intensity	191
10.2	Discontinuities, Stress Concentration	199
10.3	Combined Stresses	199
10.4	Creep	203
10.5	Fatigue	205
10.6	Beams	207
10.7	Shafts, Bending, and Torsion	224
10.8	Columns	229
10.9	Cylinders, Spheres, and Plates	235
10.10	Contact Stresses	242
10.11	Rotating Elements	244
10.12	Design Solution Sources and Guidelines	244
11.	Concurrent Engineering Revisited: How Far Have We Come?	249
11.1	Origin of CE	249
11.2	Adoption of CE	250
11.3	Definition of CE	250
11.4	The CE Team	250
11.5	The Essence of CE	250
11.6	Barriers to CE	251
11.7	Applicability of CE	252
11.8	CE and the Individual	252
11.9	Teamwork Can Lead to Chaos	252
11.10	CE and Innovation	253
11.11	CE Lessons	253
11.12	Concurrent Engineering Technologies	253
11.13	Application of CE Principles	258
12.	Concurrent Engineering Technologies	261
12.1	Introduction	261
12.2	Collocation Services	262
12.3	Coordination Services	264
12.4	Information Sharing	267
12.5	Corporate History Management Services	271
12.6	Conclusion	274

13. Computer-Aided Design	275
13.1 Introduction to Computer-Aided Design (CAD)	275
13.2 Hardware	282
13.3 The Computer	283
13.4 Memory Systems	287
13.5 Input Devices	290
13.6 Output Devices	293
13.7 Software	296
13.8 CAD Software	301
13.9 CAD Standards and Translators	309
13.10 Applications of CAD	314
14. Virtual Reality — a New Technology for the Mechanical Engineer	319
14.1 Introduction	319
14.2 Virtual Reality	319
14.3 VR Technology	320
14.4 VR System Architecture	323
14.5 Three-Dimensional Computer Graphics vs. VR	324
14.6 VR for Mechanical Engineering	325
14.7 Virtual Prototyping/Manufacturing and VR	326
15. Ergonomic Factors in Design	329
15.1 Ergonomics	329
15.2 Human Performance	329
15.3 The Design Process	330
15.4 Design Research	331
15.5 Ergonomic Analyses	332
15.6 Design Research Methods	336
15.7 Cost-Benefit Analysis of Ergonomics and Design Research	337
16. Electronic Packaging	339
16.1 Introduction	339
16.2 Component Mounting	341
16.3 Fastening and Joining	342
16.4 Interconnection	344
16.5 Materials Selection	345
16.6 Shock and Vibration	345
16.7 Structural Design	347
16.8 Thermal Design	348
16.9 Manufacturability	350

16.10 Protective Packaging	350
17. Design Optimization—An Overview	353
17.1 Introduction	353
17.2 Requirements for the Application of Optimization Methods	354
17.3 Applications of Optimization in Engineering	356
17.4 Structure of Optimization Problems	366
17.5 Overview of Optimization Methods	368
17.6 Summary	373
18. Failure Considerations	377
18.1 Criteria of Failure	377
18.2 Failure Modes	378
18.3 Elastic Deformation and Yielding	382
18.4 Fracture Mechanics and Unstable Crack Growth	383
18.5 Fatigue and Stress Concentration	396
18.6 Creep and Stress Rupture	437
18.7 Combined Creep and Fatigue	443
18.8 Fretting and Wear	449
18.9 Corrosion and Stress Corrosion	462
18.10 Failure Analysis and Retrospective Design	468
19. Total Quality Management in Mechanical Design	475
19.1 Introduction	475
19.2 TQM in General	476
19.3 Deming's Approach to TQM	477
19.4 Quality in the Design Phase	477
19.5 Quality Tools and Methods	480
20. Reliability in Mechanical Design	487
20.1 Introduction	487
20.2 Basic Reliability Networks	488
20.3 Mechanical Failure Modes and Causes	491
20.4 Reliability-Based Design	491
20.5 Design-Reliability Tools	492
20.6 Design Life-Cycle Costing	501
20.7 Risk Assessment	501
20.8 Failure Data	504
21. Lubrication of Machine Elements	507
Symbols	508
21.1 Lubrication Fundamentals	512

21.2	Hydrodynamic and Hydrostatic Lubrication	523
21.3	Elastohydrodynamic Lubrication	556
21.4	Boundary Lubrication	616
22.	Seal Technology	629
22.1	Introduction	629
22.2	Static Seals	629
22.3	Dynamic Seals	638
23.	Vibration and Shock	661
23.1	Vibration	661
23.2	Rotational Imbalance	668
23.3	Vibration Measurement	673
23.4	Acceleration Measurement	681
23.5	Shock Measurement and Analysis	692
23.6	Shock Testing	695
23.7	Shake Tests for Electronic Assemblies	705
24.	Noise Measurement and Control	711
24.1	Sound Characteristics	711
24.2	Frequency and Wavelength	712
24.3	Velocity of Sound	712
24.4	Sound Power and Sound Pressure	712
24.5	Decibels and Levels	712
24.6	Combining Decibels	712
24.7	Sound Produced By Several Machines of the Same Type	713
24.8	Averaging Decibels	715
24.9	Sound-Level Meter	715
24.10	Sound Analyzers	715
24.11	Correction for Background Noise	715
24.12	Measurement of Machine Noise	716
24.13	Small Machines in a Free Field	716
24.14	Machines in Semireverberant Locations	716
24.15	Two-Surface Method	717
24.16	Machinery Noise Control	719
24.17	Sound Absorption	719
24.18	Noise Reduction Due to Increased Absorption in Room	720
24.19	Sound Isolation	720
24.20	Single Panel	721
24.21	Composite Panel	721

24.22 Acoustic Enclosures	722
24.23 Double Walls	723
24.24 Vibration Isolation	723
24.25 Vibration Damping	725
24.26 Mufflers	725
24.27 Sound Control Recommendations	727
25. Nondestructive Testing	729
25.1 Introduction	729
25.2 Liquid Penetrants	730
25.3 Ultrasonic Methods	732
25.4 Radiography	738
25.5 Eddy Current Inspection	746
25.6 Thermal Methods	750
25.7 Magnetic Particle Method	751
25.8 Appendix A Ultrasonic Properties of Common Materials	754
25.9 Appendix B Electrical Resistivities and Conductivities of Commercial Metals and Alloys	759
Part 2 Systems and Controls	761
26. Systems Engineering: Analysis, Design, and Information Processing for Analysis and Design	763
26.1 Introduction	763
26.2 The System Life Cycle and Functional Elements of Systems Engineering	765
26.3 Systems Engineering Objectives	770
26.4 Systems Engineering Methodology and Methods	771
26.5 System Design	784
26.6 Conclusions	792
27. Mathematical Models of Dynamic Physical Systems	795
27.1 Rationale	795
27.2 Ideal Elements	796
27.3 System Structure and Interconnection Laws	802
27.4 Standard Forms for Linear Models	807
27.5 Approaches to Linear Systems Analysis	813
27.6 State-Variable Methods	829
27.7 Simulation	840
27.8 Model Classifications	846

28. Basic Control Systems Design	867
28.1 Introduction	868
28.2 Control System Structure	869
28.3 Transducers and Error Detectors	872
28.4 Actuators	875
28.5 Control Laws	880
28.6 Controller Hardware	886
28.7 Further Criteria for Gain Selection	887
28.8 Compensation and Alternative Control Structures	893
28.9 Graphical Design Methods	896
28.10 Principles of Digital Control	901
28.11 Uniquely Digital Algorithms	903
28.12 Hardware and Software for Digital control	909
28.13 Future Trends in control Systems	912
29. Measurements	917
29.1 Standards and Accuracy	917
29.2 Impedance Concepts	919
29.3 Error Analysis	923
29.4 Appendix	928
Part 3 Manufacturing Engineering	933
30. Product Design for Manufacturing and Assembly (DFM&A)	935
30.1 Introduction	935
30.2 Design for Manufacturing and Assembly	936
30.3 Why is DFM&A Important?	950
31. Classification Systems	951
31.1 Part Family Classification and Coding	951
31.2 Engineering Materials Taxonomy	962
31.3 Fabrication Process Taxonomy	967
31.4 Fabrication Equipment Classification	974
31.5 Fabrication Tool Classification and Coding	981
32. Production Planning	987
32.1 Introduction	987
32.2 Forecasting	988
32.3 Inventory Models	994
32.4 Aggregate Planning—Master-Scheduling	1003
32.5 Materials Requirements Planning	1006
32.6 Job Sequencing and Scheduling	1014

32.7 Other Related Topics	1029
33. Production Processes and Equipment	1035
33.1 Metal-Cutting Principles	1036
33.2 Machining Power and Cutting Forces	1039
33.3 Tool Life	1041
33.4 Metal-Cutting Economics	1043
33.5 Cutting-Tool Materials	1046
33.6 Turning Machines	1048
33.7 Drilling Machines	1051
33.8 Milling Processes	1060
33.9 Gear Manufacturing	1063
33.10 Thread Cutting and Forming	1067
33.11 Broaching	1068
33.12 Shaping, Planing, and Slotting	1070
33.13 Sawing, Shearing, and Cutting Off	1073
33.14 Machining Plastics	1074
33.15 Grinding, Abrasive Machining, and Finishing	1074
33.16 Nontraditional Machining	1079
34. Metal Forming, Shaping, and Casting	1101
34.1 Introduction	1101

56.7 Characteristics of the Radiation Produced By Nuclear Systems	1712
56.8 Biological Effects of Radiation	1714
56.9 The Chain Reaction	1715
56.10 Power Production By Reactors	1718
56.11 Reactor Safety Analysis	1720
57. Gas Turbines	1723
57.1 Introduction	1723
57.2 Gas Turbine Performance	1740
57.3 Applications	1749
57.4 Evaluation and Selection	1759
58. Steam Turbines	1765
58.1 Historical Background	1765
58.2 The Heat Engine and Energy Conversion Processes	1767
58.3 Selected Steam Thermodynamic Properties	1772
58.4 Blade Path Design	1775
59. Internal Combustion Engines	1801
59.1 Types and Principles of Operation	1801
59.2 Fuels and Knock	1808
59.3 Performance and Efficiency	1814

59.4 Emissions and Fuel Economy Regulations 1822

60. Hydraulic Systems 1831

60.1 Hydraulic Fluids 1831

60.2 Contamination Control 1832

60.3 Positive Aspects of Contamination 1833

60.4 Design Equations — Orifices and Valves 1834

60.5 Design Equations — Pipes and Fittings 1835

60.6 Hydrostatic Pumps and Motors 1838

60.7 Stiffness in Hydraulic Systems 1843

60.8 System Classifications 1847

60.9 Pump Sets and Accumulators 1847

60.10 Hydrostatic Transmissions 1851

60.11 Concept of Feedback Control in Hydraulics 1852

60.12 Improved Model 1854

60.13 Electrohydraulic Systems — Analog 1856

60.14 Electrohydraulic Systems — Digital 1860

61. Air Compressors 1865

61.1 Introduction 1865

61.2 Types 1865

61.3 Sizing 1875

61.4 Selection 1876

61.5 Cost of Air Leaks 1876

62. Refrigeration 1879

62.1 Introduction 1879

62.2 Basic Principles 1880

62.3 Refrigeration Cycles and System Overview 1881

62.4 Refrigerants 1883

62.5 Absorption Systems 1891

62.6 Steam Jet Refrigeration 1894

62.7 Indirect Refrigeration 1894

62.8 System Components 1897

62.9 Defrost Methods 1909

62.10 System Design Considerations 1910

62.11 Refrigeration System Specifications 1910

63. Cryogenic Systems 1915

63.1 Cryogenics and Cryofluid Properties 1915

63.2 Cryogenic Refrigeration and Liquefaction Cycles 1921

63.3	Cryogenic Heat-Transfer Methods	1930
63.4	Insulation Systems	1939
63.5	Materials for Cryogenic Service	1943
63.6	Special Problems in Low-Temperature Instrumentation	1953
63.7	Examples of Cryogenic Processing	1955
63.8	Superconductivity and Its Applications	1963
63.9	Cryobiology and Cryosurgery	1969
64.	Indoor Environmental Control	1973
64.1	Moist Air Properties and Conditioning Processes	1973
64.2	Space Heating	1982
64.3	Space Cooling	1988
64.4	Air-Conditioning Equipment	1991
64.5	Room Air Distribution	1997
64.6	Building Air Distribution	2000
65.	Air Pollution-Control Technologies	2011
65.1	Sulfur Dioxide Control	2012
65.2	Oxides of Nitrogen—Formation and Control	2015
65.3	Control of Particulate Matter	2020
65.4	Carbon Monoxide	2022
65.5	Volatile Organic Compounds and Organic Hazardous Air Pollutants	2022
65.6	Metal Hazardous Air Pollutants	2024
65.7	Incineration	2025
65.8	Alternative Pollution-Control Approaches	2025
65.9	Global Climate Change	2026
66.	Water Pollution-Control Technology	2031
66.1	Introduction	2031
66.2	Municipal Wastewater Treatment	2032
66.3	Industrial Wastewater and Hazardous Waste Treatment	2035
Part 5	Management, Finance, Quality, Law, and Research	2045
67.	Management Control of Projects	2047
67.1	General Models for the Management Control of Projects	2047
67.2	Systems Dynamic Models and Controlling the Work of Project Teams	2053
67.3	Specific Issues in the Project-Control Structure	2056
67.4	Specific Issues in The Project-Control Process	2063

67.5 A Survey of Computer Software for the Management Control of Projects 2083

68. Managing People 2085

68.1 Critical Issues of Managing in Technology-Based Environments 2085

68.2 Motivation and Engineering Performance 2086

68.3 Managing Without Formal Authority 2087

68.4 An Increased Focus on Team Performance 2088

68.5 Characteristics of High Performing Engineering Teams 2089

68.6 Barriers to High Team Performance 2091

68.7 Building Self-Directed Teams 2092

68.8 Recommendations 2094

68.9 A Final Message 2095

69. Finance and the Engineering Function 2097

69.1 Introduction and Outline 2097

69.2 A Financial Model 2100

69.3 Balance Sheet 2100

69.4 Profit and Loss Statement 2105

69.5 Cash Flow Or Source and Application of Funds 2107

69.6 Evaluating Results and Taking Action 2111

69.7 Financial Tools for the Independent Professional Engineer 2114

69.8 Conclusions 2116

70. Detailed Cost Estimating 2117

70.1 The Anatomy of a Detailed Estimate 2118

70.2 Discussion of Types of Costs 2121

70.3 Collecting the Ingredients of the Estimate 2121

70.4 The First Questions to Ask (And Why) 2124

70.5 The Estimate Skeleton: the Work Breakdown Structure 2125

70.6 The Hierarchical Relationship of a Detailed Work Breakdown Structure 2125

70.7 Functional Elements Described 2125

70.8 Physical Elements Described 2125

70.9 Treatment of Recurring and Nonrecurring Activities 2128

70.10 Work Breakdown Structure Interrelationships 2128

70.11 Methods Used Within the Detailed Estimating Process 2129

70.12 Developing a Schedule 2132

70.13 Techniques Used in Schedule Planning 2134

70.14 Estimating Engineering Activities 2134

70.15 Manufacturing/ Production Engineering	2135
70.16 Estimating Manufacturing/ Production and Assembly Activities	2136
70.17 Manufacturing Activities	2137
70.18 In-Process inspection	2137
70.19 Testing	2137
70.20 Computer Software Cost Estimating	2139
70.21 Labor Allowances	2140
70.22 Estimating Supervision, Direct Management, and Other Direct Charges	2141
70.23 The Use of "Factors" in Detailed Estimating	2142
70.24 Concluding Remarks	2142
71. Investment Analysis	2143
71.1 Essentials of Financial Analysis	2143
71.2 Investment Decisions	2148
71.3 Evaluation Methods	2152
72. Total Quality Management and the Mechanical Engineer	2159
72.1 What is Total Quality Management?	2159
72.2 Definitions of <i>Quality</i>	2160
72.3 What Are the Benefits for My Company?	2161
72.4 How Will It Change My Role?	2162
72.5 What Are the Tools of Total Quality Management and How Do I Use Them?	2164
72.6 Summary	2176
73. Registrations, Certifications, and Awards	2177
73.1 Introduction	2177
73.2 Registrations and Certifications	2177
73.3 Quality Awards	2180
74. Safety Engineering	2193
74.1 Introduction	2194
74.2 Government Regulatory Requirements	2195
74.3 System Safety	2197
74.4 Human Factors Engineering/Ergonomics	2202
74.5 Engineering Controls for Machine Tools	2205
74.6 Machine Safeguarding Methods	2207
74.7 Alternatives to Engineering Controls	2208
74.8 Design and Redesign	2213
74.9 Personal Protective Equipment	2214
