PREFACE TO FOURTH EDITION ix

PREFACE TO THIRD EDITION xi

ACKNOWLEDGEMENTS xiii

LIST OF SYMBOLS xiv

1. Introduction: Dimensional Analysis: Similitude 1

Definition of a turbomachine 1

Units and dimensions 3

Dimensional analysis and performance laws 4

Incompressible fluid analysis 6

Performance characteristics 7

Variable geometry turbomachines 9

Specific speed 10

Cavitation 12

Compressible gas flow relations 15

Compressible fluid analysis 16

The inherent unsteadiness of the flow within turbomachines 20

References 21

Problems 22

2. Basic Thermodynamics, Fluid Mechanics: Definitions of Efficiency 23

Introduction 23

The equation of continuity 23

The first law of thermodynamics – internal energy 24

The momentum equation – Newton's second law of motion 25

The second law of thermodynamics – entropy 29

Definitions of efficiency 30

Small stage or polytropic efficiency 35

Nozzle efficiency 41

Diffusers 43

References 53

Problems 53

3. Two-dimensional Cascades 55

<i>Introduction</i>	55
<i>Cascade nomenclature</i>	56
<i>Analysis of cascade forces</i>	57
<i>Energy losses</i>	59
<i>Lift and drag</i>	59
<i>Circulation and lift</i>	61
<i>Efficiency of a compressor cascade</i>	62
<i>Performance of two-dimensional cascades</i>	63
<i>The cascade wind tunnel</i>	63
<i>Cascade test results</i>	65
<i>Compressor cascade performance</i>	68
<i>Turbine cascade performance</i>	70
<i>Compressor cascade correlations</i>	71
<i>Fan blade design (McKenzie)</i>	80
<i>Turbine cascade correlation (Ainley)</i>	81
<i>Comparison of the profile loss in a cascade and in a turbine stage</i>	86
<i>Optimum space-chord ratio of turbine blades (Zweifel)</i>	87
<i>References</i>	88
<i>Problems</i>	90

4. Axial-flow Turbines: Two-dimensional Theory 93

<i>Introduction</i>	93
<i>Velocity diagrams of the axial turbine stage</i>	93
<i>Thermodynamics of the axial turbine stage</i>	94
<i>Stage losses and efficiency</i>	96
<i>Soderberg's correlation</i>	97
<i>Types of axial turbine design</i>	99
<i>Stage reaction</i>	101
<i>Diffusion within blade rows</i>	103
<i>Choice of reaction and effect on efficiency</i>	107
<i>Design point efficiency of a turbine stage</i>	108
<i>Maximum total-to-static efficiency of a reversible turbine stage</i>	112
<i>Stresses in turbine rotor blades</i>	114
<i>Turbine flow characteristics</i>	120
<i>Flow characteristics of a multistage turbine</i>	122
<i>The Wells turbine</i>	124
<i>References</i>	132
<i>Problems</i>	133

5. Axial-flow Compressors and Fans 137

<i>Introduction</i>	137
<i>Two-dimensional analysis of the compressor stage</i>	138
<i>Velocity diagrams of the compressor stage</i>	140
<i>Thermodynamics of the compressor stage</i>	141

<i>Stage loss relationships and efficiency</i>	142
<i>Reaction ratio</i>	143
<i>Choice of reaction</i>	143
<i>Stage loading</i>	144
<i>Simplified off-design performance</i>	145
<i>Stage pressure rise</i>	147
<i>Pressure ratio of a multistage compressor</i>	148
<i>Estimation of compressor stage efficiency</i>	149
<i>Stall and surge phenomena in compressors</i>	154
<i>Control of flow instabilities</i>	159
<i>Axial-flow ducted fans</i>	160
<i>Blade element theory</i>	162
<i>Blade element efficiency</i>	163
<i>Lift coefficient of a fan aerofoil</i>	164
<i>References</i>	165
<i>Problems</i>	166

6. Three-dimensional Flows in Axial Turbomachines 169

<i>Introduction</i>	169
<i>Theory of radial equilibrium</i>	169
<i>The indirect problem</i>	171
<i>The direct problem</i>	179
<i>Compressible flow through a fixed blade row</i>	180
<i>Constant specific mass flow</i>	181
<i>Off-design performance of a stage</i>	183
<i>Free-vortex turbine stage</i>	184
<i>Actuator disc approach</i>	186
<i>Blade row interaction effects</i>	190
<i>Computer-aided methods of solving the through-flow problem</i>	191
<i>Secondary flows</i>	193
<i>References</i>	195
<i>Problems</i>	196

7. Centrifugal Pumps, Fans and Compressors 199

<i>Introduction</i>	199
<i>Some definitions</i>	200
<i>Theoretical analysis of a centrifugal compressor</i>	202
<i>Inlet casing</i>	203
<i>Impeller</i>	203
<i>Conservation of rothalpy</i>	204
<i>Diffuser</i>	205
<i>Inlet velocity limitations</i>	205
<i>Optimum design of a pump inlet</i>	206
<i>Optimum design of a centrifugal compressor inlet</i>	208
<i>Slip factor</i>	213
<i>Head increase of a centrifugal pump</i>	218

viii Contents

<i>Performance of centrifugal compressors</i>	219
<i>The diffuser system</i>	227
<i>Choking in a compressor stage</i>	230
<i>References</i>	232
<i>Problems</i>	233

8. Radial Flow Gas Turbines 236

<i>Introduction</i>	236
<i>Types of inward flow radial turbine</i>	237
<i>Thermodynamics of the 90 deg IFR turbine</i>	239
<i>Basic design of the rotor</i>	241
<i>Nominal design point efficiency</i>	242
<i>Mach number relations</i>	246
<i>Loss coefficients in 90 deg IFR turbines</i>	247
<i>Optimum efficiency considerations</i>	248
<i>Criterion for minimum number of blades</i>	253
<i>Design considerations for rotor exit</i>	256
<i>Incidence losses</i>	260
<i>Significance and application of specific speed</i>	263
<i>Optimum design selection of 90 deg IFR turbines</i>	266
<i>Clearance and windage losses</i>	269
<i>Pressure ratio limits of the 90 deg IFR turbine</i>	269
<i>Cooled 90 deg IFR turbines</i>	271
<i>References</i>	272
<i>Problems</i>	273

9. Hydraulic Turbines 277

<i>Introduction</i>	277
<i>Hydraulic turbines</i>	278
<i>The Pelton turbine</i>	281
<i>Reaction turbines</i>	290
<i>The Francis turbine</i>	290
<i>The Kaplan turbine</i>	296
<i>Effect of size on turbomachine efficiency</i>	299
<i>Cavitation</i>	301
<i>References</i>	305
<i>Problems</i>	306

Bibliography 309

Appendix 1. Conversion of British and US Units to SI Units 310

Appendix 2. Answers to Problems 311

Index 315
