SHELL EO/EG PROCESS MEMORANDUM 116

SUBJECT : ADVANCED PROCESS CONTROL

DATE OF ISSUE : NOVEMBER 2005

The Kharg EO/EG design has been extended with Advanced Process Control (APC) functionality provided by Shell Global Solutions as a separate project. The Kharg process design package has been adapted to be fully compatible with the APC functionalities and has been designed to maximize the benefits for the owner. Please refer to the conceptual design report issued separately from this process design package. The conceptual design report gives an overview of advanced process control applications for the process, indicates the hardware requirements and describes the implementation strategy.
